Executive Summary

As JLL continues to expand its global footprint and digital service offerings, our firm is leveraging a wide array of technology tools across its business line, from facility management and capital planning to workplace experience and sustainability. However, the growing complexity and volume of technology solutions have created a pressing need for **a simplified, centralized, accessible, and intuitive reference system** to improve internal visibility, team collaboration, and utilization.

This capstone project aims to address this challenge by building a centralized **Technology Product Catalog,** an intuitive, searchable, and structured inventory of JLL's digital ecosystem for internal use. Drawing for colleagues' interviews, product documentations, webpages, and use case research, the catalog maps over 76+ tools, and provides provides a succinct summary of **what the tool does, who uses it, why it matters, and how it aligns with service delivery**.

Ultimately, this initiative aims to empower teams, especially within leadership level, across Work Dynamics, Capital Markets, PDS, and beyond with **faster onboarding, strategic procurement decisions, more efficient tech integration, stronger cross-functional collaboration.** By simplifying access to technology insights, the catalog will help JLL unlocking greater operational efficiency and technology adoption across JLL's technology investments.

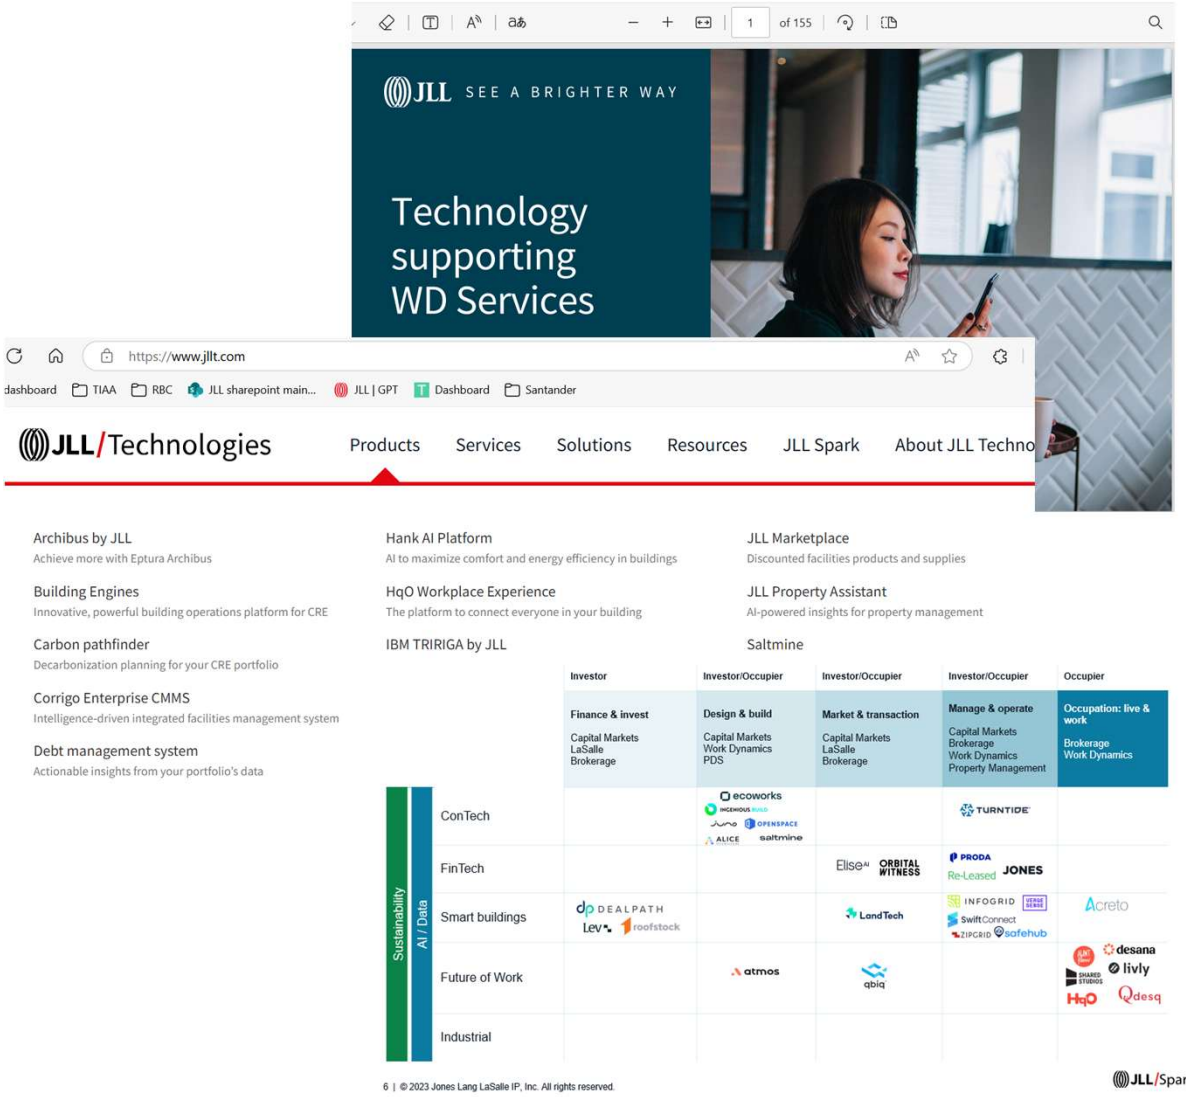
The Challenge

76+ technologies used across Work Dynamics, PDS, Capital Markets, and more

- Lack of central reference point for tools' brief summary, functionality, users, or direct learning access
- Inefficiencies in onboarding, procurement, and collaboration
- Siloed knowledge about tools from different resources
- Inconsistent client delivery using different tools across region



Inc. All rights reserved.

The Opportunity

Greater Visibility

- One Stop view of 76+ tech tools, sorted by function, business line, and user type
- Equips leaders to make informed investment and partnership decisions

Faster Onboarding & Training

- New hires can quickly understand what tools are available and when to use them
- Reduces learning curve and dependency on tribal knowledge

Reduce Duplication of Tools & Cost

- Helps reduce tech redundancy
- Identifies overlapping tools and consolidate contracts
- Highlights functional gaps and areas for future development or acquisition

Consistent Client Delivery

- Ensures teams across regions are using approved tools
- Supports a unified JLL brand and service standard

Dashboard Insights

- **Work Dynamics:** Highest Concentration of tools (~40%)
- **Capital Markets:** Specialized tools for asset intelligence and deal evaluation
- **PDS:** Strong presence in budgeting, capital planning, and project tracking
- **HR, Finance:** Smaller number, mostly internal or compliance related

Top 5 Function

- Portfolio & Transaction Management
- Workplace & Experience Management
- Data & Analytics Platform
- Operational Efficiency
- Smart Building & IoT

Next Steps

Goals

- Make the catalog accessible to all relevant stakeholders
- Keep the catalog accurate and up to date
- Encourage consistent usage across JLL
- Turn catalog insights into actions

1. Training leader and manager team
2. Including in the new hire onboarding decks
3. Use it during annual tech reviews and client planning session

1. Leverage usage data to identify tech consolidation opportunities
2. Align catalog with JLL's digital transformation roadmap
3. Track tool adoption KPIs by region or business line
4. Use catalog insights to inform future tech investment or partnerships

1. Host on JLLT intranet, internal Sharepoint, or JLLGPT system
2. Link catalog to JLL training portals or onboarding packages
3. Add PowerBI dashboard for real time visual insights

1. Assign owners for each business unit to own updates quarterly
2. Define a single point of contact for product updates and verification
3. Create a light submission workflow for to add/edit entries
4. Build retirement policy for outdated or duplicate tools

Thank you
